## Exercises on the topics of class 9

## Exercises with solutions

Ex. 1. Build the truth table for the following BE:

$$
(x \oplus(y \operatorname{NOR} \bar{z})) \operatorname{NAND}(x+y z)
$$

SOLUTION:

|  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $x$ | $y$ | $z$ | $\bar{z}$ | $y N O R \bar{z}$ | $x \oplus(y N O R \bar{z})$ | $y z$ | $x+y z$ | $x \oplus(y$ NOR $z) N A N D(x+y z)$ |
| 0 | 0 | 0 | 1 | 0 | 0 | 0 | 0 | 1 |
| 0 | 0 | 1 | 0 | 1 | 1 | 0 | 0 | 1 |
| 0 | 1 | 0 | 1 | 0 | 0 | 0 | 0 | 1 |
| 0 | 1 | 1 | 0 | 0 | 0 | 1 | 1 | 1 |
| 1 | 0 | 0 | 1 | 0 | 1 | 0 | 1 | 0 |
| 1 | 0 | 1 | 0 | 1 | 0 | 0 | 1 | 1 |
| 1 | 1 | 0 | 1 | 0 | 1 | 0 | 1 | 0 |
| 1 | 1 | 1 | 0 | 0 | 1 | 1 | 1 | 0 |

Ex. 2. Check the following equality, by using the truth tables:

$$
\bar{x}+z(\bar{x}+y)=\bar{x}+z y
$$

Then, write the dual and the complementary versions of the given equality.
SOLUTION:
The truth table of the two expressions is:

| $x$ | $y$ | $z$ | $\bar{x}$ | $z y$ | $\bar{x}+z y$ | $\bar{x}$ | $\bar{x}+y$ | $\bar{z}(x+y)$ | $\bar{x}+z(\bar{x}+y)$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 0 | 0 | 0 | 1 | 0 | 1 | 1 | 1 | 0 | 1 |
| 0 | 0 | 1 | 1 | 0 | 1 | 1 | 1 | 1 | 1 |
| 0 | 1 | 0 | 1 | 0 | 1 | 1 | 1 | 0 | 1 |
| 0 | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 1 |
| 1 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| 1 | 0 | 1 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| 1 | 1 | 0 | 0 | 0 | 0 | 0 | 1 | 0 | 0 |
| 1 | 1 | 1 | 0 | 1 | 1 | 0 | 1 | 1 | 1 |

The dual equality is $\quad \bar{x}(z+\bar{x} y)=\bar{x}(z+y)$
The complementary equality is $x(\bar{z}+x \bar{y})=x(\bar{z}+\bar{y})$

Ex. 3. Let $\mathrm{y}=\mathrm{x} 1 \mathrm{x} 0+\underline{\mathrm{x} 1} \underline{\mathrm{x} 0}$. Express y in ALL-NAND form.
SOLUTION:
By using De Morgan and the definition of negation with NAND, we have

$$
\begin{aligned}
\mathrm{x} 1 \mathrm{x} 0+\underline{\mathrm{x} 1} \underline{\mathrm{x} 0} 0 & =\mathrm{x} 1 \mathrm{x} 0+(\mathrm{x} 1+\mathrm{x} 0) \\
& =(\mathrm{x} 1 \mathrm{x} 0) \text { NAND } \mathrm{x} 1+\mathrm{x} 0) \\
& =(\mathrm{x} 1 \text { NAND } \mathrm{x} 0) \text { NAND }(\underline{\mathrm{x} 1} \text { NAND } \underline{\mathrm{x} 0}) \\
& =(\mathrm{x} 1 \text { NAND } \mathrm{x} 0) \text { NAND }((\mathrm{x} 1 \text { NAND } \mathrm{x} 1) \text { NAND }(\mathrm{x} 0 \text { NAND } \mathrm{x} 0))
\end{aligned}
$$

## Exercises without solutions

Ex. 1. Consider the following BE: $\quad x+\bar{z}(x+\bar{y}(x+z))$.
Build up its truth table, its dual and its complemetary expressions.
Ex. 2. Consider the following BEs, where $\oplus$ denotes the XOR. Rewrite them first in form allNAND and then in form all-NOR:

$$
\begin{aligned}
& \mathrm{X} \oplus(\mathrm{Y} \oplus \mathrm{Z}) \\
& \mathrm{XY}+\mathrm{XZ}+\mathrm{YZ}
\end{aligned}
$$
