

Mr Marco Marini tips

Choose a topic you like and you know the best. Every kind of topic

You must convey something to the student

In 15 minutes prepare a lesson with power point or similar.

The discussion on the topic is divided in 3 parts:

- Frontal teaching
- **Practical example (from everyday life):** do you know, have you ever seen..... practical example is more important than theory
- Interaction with class
Interaction is important to see if we are able to explain a topic in a good way to people who know nothing

One example is American teaching school

Few words

Lots of images

Use of capital letters
